## **Contents**

The contents should list the chapter headings, sections and subsections of the different chapters along with page numbers of each. It should be possible to get a complete picture of the thesis by looking at the contents. While the contents cannot be as brief as listing only the chapter headings, it need not be as elaborate as to list all paragraph titles within subsections. It is preferable to include the chapter, section and subsection headings only in the contents with appropriate page numbers.

## **List of Symbols**

List the Greek symbols first English letters next, lower case letters and upper case letters in this order. Each group should be arranged in alphabetic order.

## **List of Figures**

List the number and captions of the figures with page numbers.

## **List of Tables**

List the number and titles of the tables with page numbers

## **Page Numbering**

The preliminary parts are numbered in roman numerals (i, ii, etc). The first page of the first chapter (Introduction) onwards will be numbered in Arabic numerals 1 2 3 etc.

## **Numbering Sections, Subsections, Equations, Figures, etc.**

A word on numbering scheme used in the thesis is in order. It is common practice to use decimal numbering in the thesis. If the chapter number is 2, the section numbers will be 2.1, 2.2, 2.3 etc. The subsections in section 2.2 will be numbered as 2.2.1, 2.2.2 etc. Unless essential, it is not necessary to use numbers to lower levels than three stages. Headings of paragraphs below the subsections may be bold faced and in sentence case.

Similarly, it is useful and convenient to number the figures also chapter-wise. The figures in chapter 4 will be numbered Fig. 4.1, Fig 4.2 etc. This helps you in assembling the figures and putting it in proper order. Similarly, the tables also numbered as Table 4.1 Table 4.2 etc.

Usually the figure captions are written below the figure and table captions on top of the table. All figures should have proper description by legends, title of the axes and any other information to

make the figures self-explanatory. Figures in color are not essential, but if it is essential, can be given. If used, all copies submitted should have figures in color.

The same numbering scheme can be used for equations also. Only thing to be remembered is that references to the figures are made like Fig 4.5 and equations as Eqn. (3.2) and tables as Table 2.1. If there are some appendices, these can be numbered as A1, A2, and A3 etc. The equations in these appendices can be numbered as (A1.1), (A2.3) etc.

References can be numbered as 1, 2, 3 etc in the order in which they are referred to in the body of the thesis. A typical reference in the body of the thesis will appear as “as stated in [3] or in [3] – [5]” etc. An alternate way as mentioned in some journals is to arrange the references in the alphabetical order of the names of authors in which case the reference in the body of the thesis looks like “as mentioned in (Adam and Eve 1946)”. However, for uniformity and brevity, the first method (like the one followed in IEEE journals) is to be used.

Bibliography contains materials that were useful for the preparation of the thesis in a general way and is not directly referred to in the thesis. IT is not essential, but will be of immense help for a student who tries to read and understand the contents of the thesis.

References to journal papers should contain the name of the author(s), title of the paper, name of the journal, volume number, issue number, particular pages (pp) and year of publication.

### **Example:**

American Psychological Association (APA) Citation Style Should follow as it is the standard across the Researcher Community across world.

e.g. **Pandey, Krishan K.**, Pragma, N. & Sahoo, P.K. (2011), “[Life cycle assessment of small-scale high-input Jatropha biodiesel production in India](#)” **Applied Energy**, Elsevier, Vol. 88, issue 12, pp. 4831-4839.

Similarly, conference papers should mention the name of author(s), title of the paper, name of the conference, place in which the conference was held and date, month and year of the conference along with the page numbers of the paper in the proceedings of the conference.

### **Appendices**

If there is material that if included in the body of the thesis would break up the flow of reading or bore the reader unbearably, it is better to include it as an appendix. Some items which are typically included in appendices are: major derivations or theoretical developments, important and original computer programs, data files that are too large to be represented simply in the results chapters, pictures or diagrams of results which are not important enough to keep in the main text etc.

## Curriculum Vitae with List of Publications

Briefly indicate your relevant background. You can list your publications. Only publications published or accepted for publication need be listed. If communicated and under review, the date of submission should be indicated.
