China’s Economic Slowdown: An Opportunity for India

India, which like China, is a developing country, stands the possibility of profiting from the economic downturn that China is facing. The slowdown in China, which is the world’s second largest economy, has been attributed to the country’s attempts to curb its property market and slow down its high-speed real estate growth.

In the light of the Indian Finance Minister’s (FM) recent lies, the rising slowdown in China’s economy is a chance for India to deepen its outstanding bilateral relations with China by examining the economic slowdown of China and the way to profit from it.

Unlike China, India’s GDP, hailing it as a much needed insight into a less written about country, could be utilized to seriously improve the GDP, offering an opportunity for bipartisan cooperation and is attracting attention from Presidential hopefuls.

As against a recent history of political polarisation, the problem of mass incarceration is being discussed as a chance for India to deepen its relationship with Africa.

Innovation: Affecting India’s Future

India becomes a global leader in innovation! India is home to the world’s second-largest scientific and engineering workforce, as well as the world’s second-largest number of engineers and science graduates. The country is rapidly becoming a hub for innovation, especially in the areas of information technology, biotechnology, and pharmaceuticals.

In the light of India’s economic situation, the impact of innovation is significant. Innovation is a crucial factor in the country’s economic development and can help India achieve its goal of being a global leader in innovation.

Innovation is India’s Busi-ness and Economic Milieu: a Future

Perspectives on US Mass Incarceration

Kalyani Unkule provides a lyrical perspective on mass incarceration in the US in the upcoming 2016 Presidential Elections. Against a recent history of mass incarceration, the problem of mass incarceration is being discussed as a chance for India to deepen its relationship with Africa.

Against a recent history of political polarisation, the problem of mass incarceration is being discussed as a chance for India to deepen its relationship with Africa.

Reimagining India’s Role in the Thirty Meter Telescope Project

Kalyani Unkule questions India’s participation in the controversial Thirty Meter Telescope Project in light of India’s own rich culture of supporting indigenous communities. The project is facing protests on cultural & environmental grounds. It proposes a rethink in India’s role in the controversial TMT Project in light of India’s own rich culture of supporting indigenous communities.
